Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-7, 9-17 and 19-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hardie' 969 et al. in view of Turner, Watson et al., and Small et al.

The Hardie'969 et al. reference discloses an automated apparatus and inherent method for storing, dispensing and orientating injectable drug vials including a robotic device 14 with associated vial and syringe handling or gripping device (20a,20b), but does not disclose a detector for determining the orientation of the associated vial. The Turner, Watson et al., and Small et al. references collectively show that detector arrangements including barcode-type, magnetic or magnetic-chip types (see col. 14, lines 3-20 of Small et al.) are known in the art to determine the location and propriety of associated drug vials. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to include a detector arrangement with the device and method disclosed by Hardie'969 et al. in view of the collective teachings of the Turner, Watson et al., and Small et al. references to determine the location and propriety of associated drug vials.

Allowable Subject Matter

Claims 8 and 18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments with respect to claims 1-7,9-17 and 19-22 have been considered but are moot in view of the new ground(s) of rejection.
